Atanas Kolev
Full-Stack Developer

+359899115617 | naskokolev00@gmail.com

Versatile Full-Stack Developer with a keen interest in emerging technologies. Proven experience in both backend and frontend development, combining technical expertise with a passion for creating innovative and seamless user experiences. Adept at collaborating within cross-functional teams to deliver robust and scalable solutions.

Professional Experience

AppFactory.BG LTD July 2021 - Present
Full-Stack Developer

- Developed features for a horse management platform, enabling users to loan, buy, and offer services using ASP.NET Core, Domain Driven Design, Docker and more.
- Played a key role as a developer in a prominent project focused on creating a sophisticated whisky recommendation system using Python
- Developed the backend logic for a robust chat system, optimizing real-time conversations and showcasing expertise in system architecture. Written with latest technologies - NodeJS, Socket.IO, Express
- I played a pivotal role in the development of restaurant reservations system for a company using mainly PHP.
- Led Angular front-end development, emphasizing responsive design and modular architecture. Collaborated with the back-end team, integrated APIs, implemented robust authentication, and optimized performance
- Developed a streamlined real estate web application using Angular.
- As a developer, my primary role in a significant project centered around whisky involved the development of image blur detection and autocropping system for bottle images.

Princess Moa Ltd. May 2020 - July 2021
Full-Stack Developer

- I actively participated in a major collaborative project focused on designing and implementing a comprehensive time slot management system for a prominent company using ASP.NET Core, Docker, DDD, EF, MySQL and Azure
